About me

I am a frontend developer, linguist, and father. I love programming and learning new technologies. I have interest in Data Science and Artificial Intelligence. In the near future I want to learn Python. My passions, besides software, are literature, philosophy, mathematics and physics. What I look for in a job is exponential growth where I can create new solutions.

Experiencia

Freelance React frontend developer
CrossFt Ajusco | March 2022 | Mexico City
